

Paper Carbon Calculators

Environmental Paper Network

Click or Scan

Free tool for calculating, comparing, and reducing paper's environmental impacts. Helps the user estimate the environmental impacts of your paper, compare grades and recycled content, and calculate the benefits of avoided use.

Neenah Paper

Click or Scan

Enables the user to calculate the environmental savings achieved by using paper with post-consumer fiber.

PRINTGREEN

Click or Scan

Not designed for the label market. This Carbon Calculator is designed to help the user make sustainable, informed decisions. Simply fill in the specification of your print campaign — such as paper type, weight, and volume — and we will calculate your estimated carbon footprint.

UPM

Click or Scan

Efficiency Calculator built by UPM Raflatac providing details on Diameter, Length, Efficiency Gains
